About me

Passionate about solving problems and fueled by curiosity, I am dedicated to seeking out complex challenges and to work alongside talented people. I strive to pursue excellence and competency in everything that I do.

I currently specialise in a Microsoft stack and React but have a solid conceptual understanding of software development and can pick up new technologies quickly.

Experience

Backend Engineer

Nov 2024 – May 2025

Zentso

Melbourne, VIC

- Led the development and completion of key modules (arrear, payment reversal, files to payment record processing, invoicing/payment enhancements) within a CRM (Imis) payment system extension project, primarily utilizing SQL stored procedures (SQL-Server).
- Collaborated closely with clients under a strict deadline, successfully delivering critical project components in a demanding environment.

Employment finished due to company transitioning from developer focused to consulting based. Can provide solid references from project owner and lead architect on request.

Full Stack Software Engineer

Mar 2022 – Feb 2024

Tait Communications

Christchurch, NZ

- Developed and maintained features for an internet-based, PTT radio solution, working extensively within multiple event-based architectures.
- Created a full-stack web application with a frontend (Vue, JS, HTML, CSS), REST API (.Net Core, C#), cache (Redis), NO-SQL database (MongoDb) for clients to be able to make Voip to PSTN Calls, configure diversion rulesets and monitor system health.
- Worked in multiple domains of software development such as mobile apps(Maui, C#), web apps, containerisation (Docker, Kubernetes), cloud infrastructure (AWS), CI/CD processes, application servers/gateways (C++), testing strategies (Python), networking and IOT devices (C++, Python).
- Migrated the deployment from a cloud solution to on-prem with HA, SNMP and other features.
- Applied tight security practices to meet clients high security requirements and mission critical compliance.
- Integrated our software solution with multiple external teams and software by collaborating within a large engineering company and other providers.

Software Developer Intern

Nov 2021 – Jan 2022

MyRaceLab

Christchurch, NZ

- Built a mobile app (TypeScript, React-Native) to record all phone sensor data, interface with a vehicle ECU via ATT commands and strip data from multiple GPS devices via bluetooth.
- Worked independently on research and development for a car racing assistant startup to extract all available sensor data from different devices.

Poker and Blackjack Dealer

Oct 2018 – Oct 2019

Christchurch Casino

Christchurch, NZ

- Excelled in performing mental arithmetic in high stakes and stressful environments.

Passion Project

DekuCards

Oct 2024 – Present

- A feature-rich SPA using React, TypeScript, and Vite, incorporating PWA functionality, RWD, and state management with Zustand and React Query, backed by a .NET C# API and a Postgres (Supabase) database.
- A nuanced flashcard application leveraging the spaced repetition algorithm, featuring an interactive tree-node UI for tracking learning progress, public card set sharing and search functionality for collaborative learning.

Portfolio site - benchamberlain.dev

Aug 2024 – Sep 2024

- Created a React/Typescript SPA application with a heavy emphasis on frontend CSS and design skills.

- Led a small startup team on an application with an innovative take on a social media/event app (Firebase) that aimed to change the nature of invites from DM's to broadcasting.
- Developed a comprehensive launch roadmap and brand design, providing significant insights into product development and user-focused growth strategies.

Interests

Football (competed in Central North Island 1st division), Boulderling/climbing (Melbourne food has been making this hard..), hiking, squash, games (of any sort), and guitar.

Education

University of Canterbury

Bachelor of Science Major in Computer Science, Minor in Mathematics

Christchurch, NZ

Graduated Jun 2021

Skills

Languages: C#, C++, Python, JavaScript/Typescript, HTML/CSS, SQL, xaml

Frameworks/Libraries: ASP.NET core, React.js, Vue.js, Flutter

Databases: MS-SQL-Server, MongoDB, Redis, Firebase

Developer Tools: Git, GitLab CI/CD, Docker, Linux

Testing Tools: GTest, GMock, Fakelt, Cypress, NUnit, Behave
